SUJEET KUMAR

Career Objective

Seeking a challenging software development role as a fresher, where I can leverage my proficiency in diverse programming languages, development methodologies, and database systems. I aim to contribute my strong problem-solving skills and collaborative abilities to drive innovative solutions and support the organization's success.

Projects

Portfolio website

- Created a dynamic web page with HTML, CSS, and JavaScript; integrated a contact form feature that enhanced user interaction and facilitated seamless user communication, leading to increase in inquiries

Netflix Clone

- Designed and developed a static webpage using HTML and CSS, implementing responsive design techniques; improved website adaptability across devices, increasing mobile user engagement and reducing bounce rate.
